PROFESSIONAL SUMMARY

Full Stack Developer with a strong focus on backend development, experienced in building and maintaining services using Node.js, NestJS, and Python/FastAPI, integrating third-party REST APIs, and working with cloud environments on AWS.

I have contributed to fintech, SaaS, and e-commerce projects, building product-oriented services, integrations with external systems, and critical production workflows. I have experience with relational and NoSQL databases, Docker, microservices, Git-based version control, and application support in collaborative environments.

I have also been involved in deployments, incident resolution, debugging, and continuous improvement processes, with a focus on building maintainable, scalable solutions aligned with real business needs.

TECHNICAL SKILLS

Backend:

Node.js, NestJS, Python (FastAPI), REST APIs, API Integrations, Microservices, Backend Services

Cloud / DevOps:

AWS (Lambda, EC2, S3, SQS, SNS, Step Functions, DynamoDB, Cognito, Route 53), Docker, CI/CD, Serverless Workflows, Cloud Environments

Databases:

PostgreSQL, MySQL, MongoDB, DynamoDB, Redis, SQL

Frontend:

React, Next.js, Angular, TypeScript

Tools / Workflow:

Git (GitHub / GitLab / Bitbucket), Jira, Agile Collaboration

EXPERIENCE

Full Stack Developer — Plux | Fintech / Payments | Remote

Mar 2024 – Apr 2025

Developed and maintained backend features in Node.js for payment-related integrations and critical transactional workflows.

Contributed to stability and security improvements for sensitive processes, including data protection and encryption-related tasks.

Collaborated in production incident resolution, including analysis, debugging, issue reproduction, and bug fixing.

Provided support for dashboards and administrative panels when needed, contributing to product-related features and internal tools.

Helped improve user experience and maintain frontend components within the platform ecosystem.

Integrated external services and REST APIs, connecting frontend interfaces with backend functionalities related to payment flows.

Worked closely with business and product needs to implement continuous improvements.

Tech: Node.js, Angular, AWS, PostgreSQL, Git, Jira, WordPress, PrestaShop, Odoo

Full Stack Developer — Roitels | SaaS / Hospitality Analytics | Remote

Apr 2025 – Sep 2025

Developed backend services using Python/FastAPI and NestJS, with a focus on modular architecture and microservices.

Integrated REST APIs from external systems, ensuring validations, data consistency, and synchronization across platforms.

Worked with AWS services and asynchronous workflows focused on scalability and distributed data processing.

Implemented and maintained queue-based and messaging workflows to support asynchronous processing and data movement between platforms.

Supported deployments and development/QA environments using Docker and CI/CD pipelines.

Participated in debugging and production incident resolution.

Developed frontend features using React and TypeScript for internal tools and product-oriented solutions.

Collaborated on integrations between frontend, backend, and external services, ensuring functional and data consistency.

Contributed to the development and maintenance of interfaces connected to backend services built with Python and NestJS.

Worked in collaborative environments where adapting to both frontend and backend needs was required.

Tech: Python (FastAPI), NestJS, React, TypeScript, AWS, PostgreSQL, MongoDB, DynamoDB, Docker, Git

Freelance Full Stack Developer — Web Projects / Cortenvio | Remote

Oct 2025 – Dec 2025

Developed a web application using Next.js and TypeScript, with PostgreSQL persistence and external API integrations for payments and shipping.

Implemented business-oriented features for quoting and order management, connecting backend services, frontend interfaces, and external integrations.

Handled deployments with Docker and configured security services, CDN, and asset management.

Worked across the full product flow, from data input and processing to order generation.

Tech: Next.js, TypeScript, PostgreSQL, Docker, GitHub
